Wing Road and RR 3174

Seal Coat Project - Update

The RM of Meota is completing a seal coating project on Wing Road from Highway 26 to the McMillan Road and on RR 3174 from Highway 26 to the Strathcona Meota West 2 Facility Access (Highlighted in red below)

The contractor is expected to start on Friday September 11, 2026, weather pending.

Work will start on the Wing Road and the first chip seal is expected to take 2-3 days to complete. The Contractor will then move over to RR 3174. A second seal coat will then be applied approximately 5 days after the first seal coat has cured and then a final flush coat will be applied after additional 7 days of curing.

One lane of traffic will remain open. Expect delays of 10-15 minutes.

The Public is advised to:

- ✓ Slow to 60km/h (this will not only save your windshield but result in a better final product. The 60 km/hr restriction will remain in place while the seal coat is curing.
- ✓ Avoid the intersecting roadways of Johnson, Iverson and Tait Road until the chip seal is fully cured and flush coated.
