

PUBLIC NOTICE

Fitzgerald Road Project

The Fitzgerald Road will be clay capped from the intersection of RR 3174 to Range Road 3181.

The project is expected to start on June 29.

In order to complete the project as fast as possible the contractor is authorized to close portions of the road.

The first closure is expected to occur on July 2.

The project will work from east to west and therefore the first two miles will be closed to accommodate construction and open to local traffic only. Following completion of the first two miles the last mile between the Iverson and McMillan Road will be closed.

Watch for detour signage and drive safely when passing construction workers.
