

PUBLIC NOTICE

DUST CONTROL

After a number of years implementing dust control pilot projects, in 2025 Council adopted a policy that will provide the service on an annual basis for a fee. The fee is set at 50% or 100% of the product cost dependent on the distance from the roadway centreline.

Agricultural district ratepayers may request the application of calcium chloride dust control, applied to the 200-meter section of roadway adjacent to their residence.

- for residences located within 150 meters of the centerline of the roadway the fee is \$330.75;
- for residences beyond the 150 meters of the centerline of the roadway the fee is \$661.50.

Deadline to request dust control and submit payment will be 12:00 p.m., Thursday, May 1, 2025. Applications will not be accepted after the deadline.
