

PUBLIC NOTICE

SAMA Annual Inspections

Saskatchewan Assessment Management Agency (SAMA) is responsible for the property assessments in the RM of Meota. Beginning Monday, November 25, 2024 an appraiser from SAMA will be conducting annual maintenance field inspections in the RM in order to update the assessment roll. The inspections will be at properties where a change in assessment value may occur, such as those properties that have been purchased in the last few years as well as properties where changes in physical information has been reported such as the addition of new dwellings, garages, sheds, decks, additions to dwellings, etc., as well as removal of buildings or assessable structures. The appraiser only needs to do an EXTERIOR inspection in order to obtain the dimensions/size, class & condition of the structure in question, exceptions to this are commercial type properties such as warehouses, retail, etc. The SAMA appraiser will have the proper identification marked on their vehicle, as well as carrying an identification card. Individual appointments will not be made at this time as it slows the inspection process. SAMA wants to be proactive by notifying property owners of our intention to complete an EXTERIOR inspection only of your property, while keeping in mind the safety of the public and our staff.
